IMRE ILYES

_SOFTWARE ENGINEER &
_FULLSTACK DEVELOPER

ABOUT ME

I have come a long way in my career. I count myself among the lucky ones who, from the very beginning, have never seen their work as a job or a duty, but as a vocation. All my life I have loved my work and have put my heart and soul into what I do. I was never motivated by the easy way out, always looking for challenges. I didn't mind if I had to work hard to succeed, I always threw myself into tasks with enthusiasm and humility and always strived for the maximum. It was extremely important for me to improve and learn new things, and that hasn't changed over the years. The milestones in my life have always followed on from each other.

The people I have had the opportunity to work with so far have introduced me to someone who has been very easy to work with. Over the years, I have learned to think in systems and work in teams. I am known as an honest and decent person. I am extremely flexible, but also determined in my work and have good coordination skills, which I have been able to put to good use in the delivery of projects. I have been able to take independent and responsible decisions in crisis situations, never looking for blame but for solutions. Perhaps one of my greatest skills is that I have a heavier than average workload and can work on several projects at the same time. I have always strived to be a good leader, not a boss who demands respect by leading by example and throwing himself into tasks first.

Imre Ilyes
Software Engineer
